REGISTRAR GENERAL'S REPORT

OF THE

BIRTHS, DEATHS, AND MARRIAGES,

IN THE

COLONY OF VICTORIA,

DURING THE YEAR ENDING 30TH JUNE, 1857.

FOURTH ANNUAL REPORT,

PURSUANT TO ACT OF COUNCIL 16 VICTORIA No. 26.

PRESENTED TO BOTH HOUSES OF PARLIAMENT BY HIS EXCELLENCY'S COMMAND.

By Authority:
JOHN FERRES, GOVERNMENT PRINTER, MELBOURNE.

No. 7.

FOURTH ANNUAL REPORT.

REGISTRAR GENERAL'S OFFICE,
Melbourne, 23rd December, 1857.

SIR,

I have the honor to submit my Fourth Annual Report of the Births, Deaths, and Marriages registered in the Colony of Victoria during the year ending 30th June, 1857.

2. According to the practice observed in preceding years, I now proceed to notice a few of the principal results which may be gathered from a perusal of the general abstract and accompanying detailed tables.

The registrations effected throughout the Colony during the year under review were:—

Births	15,937
Deaths	6,521
Marriages	4,375

Appendix.
Table I.
Table II.
Table III.

3. A steady increase to our infant population will be observed on *Births*, comparing the number of births with that shown in my previous Report, for while in the year 1855-6 the births numbered 12,779, it will be seen that in the succeeding year they amounted to 15,937, showing an increase of 3,158 on the year.

4. The excess of births registered over deaths in the year is no less than 9,416.

5. It may be interesting to note the proportions in which the births have taken place according to the quarterly periods of the year since the commencement of the registration system. There appear to have been in the quarters ending respectively:—

	1853.	1854.	1855.	1856.	1857.
30th September ...	575	2,292	3,391	3,874	—
31st December ...	919	2,232	2,864	4,022	—
31st March	—	958	2,598	3,041	4,076
30th June	—	2,047	3,088	3,483	3,965

Registrar General's
first, second, third,
and fourth Reports.

6. Of the children born in the year 1856-7, 8,093 were males and 7,844 females, being rather more than 103 boys to every 100 girls, or nearly 26 boys to 25 girls.

7. Three cases of triplets have been registered ; six of the nine children thus born being females. There were 167 cases of the birth of twins, of whom 161 were males and 173 females. The number of illegitimate births recorded was 249, being an excess of 69 over the number registered in the previous year.

The proportion of the sexes in each of these classes may be thus briefly exhibited, viz. :—

	TRIPLETS.			TWINS.			ILLEGITIMATES.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.
1853-4	Not ascertained.			34	40	37	Not ascertained.		
1854-5	2	4	2	105	81	93	58	58	116
1855-6	1	2	1	140	118	129	95	85	180
1856-7	3	6	3	161	173	167	126	123	249

8. In connection with this subject, it may be stated here that the population of the Colony on the occasion of the Census on the 29th March, 1857, was 410,766, and that on the 30th June, 1857, these numbers, corrected by the Immigration Agent's returns, and those of the births and deaths, amounted to 430,656. These figures, however, it is right to remark, afford no safe data for comparative calculations respecting a population so rapidly augmenting by the constant influx of thousands of persons of all ages and of both sexes from every part of the globe.

Marriages.

9. The marriages during the year amounted to 4,375. Of these the eldest male married had attained the mature age of sixty-four, the eldest female that of fifty-six; the youngest male married was but eighteen, and the youngest female thirteen; results almost identical with those obtained from the returns of the previous year. There were only 90 males under twenty-one years of age married during the year, while the females who married under age amounted to no less than 1,041. 434 widowers and 442 widows re-entered the married state. Eighteen of the Chinese have become married to women of European origin; nine of whom were Irish, four English, one Scotch, one Welsh, and three Euro-Australian.

10. The simple test of ability to sign the marriage registers, affords, as I have before taken occasion to remark, a good indication of the diffusion of elementary education among the people. It is gratifying to observe that the state of education among the adults of this Colony continues to be as highly satisfactory as in former years. The proportion of those married during the year ending 30th June, 1857, and who were unable to write, was only 13 out of every hundred males, and 29 out of every hundred females; while in England and Wales in the year 1856, 31.1 out of every hundred men, and 46.2 out of every hundred women that married signed the registers with marks.

11. Probably one of the most remarkable results obtainable from a *Deaths*. review of the accompanying statistical tables, is the evidence which they present of a decided decrease in the proportionate mortality of the population of the Colony, from the year to year, in the face of a flowing stream of immigration and of a rapid increase in the number of births.

12. While the population, which on the 30th June, 1856, was estimated at 330,438, had increased to 430,656 at the date of these returns, the number of deaths, which in the former year was 5,760, only amounted to 6,521 in the year 1856-7. Of these 3,267 took place among children under five years of age, 2,313 of whom died within twelve months of their birth.

13. The following comparative table will show, in view of the augmentation to the numbers of the population by births and immigration, that the annual rate of mortality has been decreasing. The deaths in the under-mentioned years have been :—

			1853-4.	1854-5.	1855-6.	1856-7.
Males	3,589	4,076	3,714	4,122
Females	2,237	2,496	2,046	2,399
Total ...			5,826	6,572	5,760	6,521

14. It is thus seen that the deaths of the past year have been less in number than those recorded in the year ending on the 30th June in 1854-5, while the population has increased from 236,798 at the Census taken on the 26th April, 1854, to 430,656 on the 30th June, 1857.

15. As may readily be supposed from the favorable rate of mortality indicated by the preceding figures, *zymotic*, i.e., *endemic*, *epidemic*, and *contagious* diseases, have not shown, up to the end of the registration year under review, any tendency to increase. In my First Annual Report, 1853-4, it was shown that nearly 40 per cent. of the males and nearly 45 per cent. of the females who died had perished from ailments of this class: in the year 1855-6 the deaths of only 23·7 per cent. of the males and 25 per cent. of the females were registered under this head. In the past year the general percentage has been under 24 per cent., being of males 22 per cent. and of females nearly 27 per cent., of deaths from *zymotic* causes, which comprise those which for the most part arise from preventable causes. The great agents in this destruction of life, both in town and country, have been dysentery, diarrhoea, and typhus, forming together in the metropolitan district 80 per cent. and in the rest of the Colony 86 per cent. of the whole *zymotic* class. Nearly two-thirds of the mortality under this head has taken place among children under five years of age.

16. Of *sporadic* diseases the deaths from causes of uncertain or variable seat amount to upwards of 15 per cent. of the total mortality. Out of 1,004 cases recorded throughout the Colony, 702 occurred among children under five years of age; and, as has been observed on previous occasions, nearly three-fourths of these arose from *atrophy* and *debility*.

17. The deaths from *diseases of the nervous system* also amount to 15 per cent. of the whole mortality, and more than two-thirds of these took place among children under the age of five. *Convulsions, disease of the brain, and hydrocephalus*, have destroyed more than 50 per cent. of the latter. Eleven cases of death from *delirium tremens* have been returned in the metropolitan district, and 21 in the remainder of the Colony. These numbers, however, must by no means be understood as indicating the full extent of the mortality which has arisen from intemperance, for besides the deaths to be found under the head of "*external causes*," there is no possibility of tracing the number who have come to a premature end through yielding to this seductive vice, because the immediate occasion of death may have been recorded in some other class of disease, such, for instance, as that of the brain or of the liver.

18. In the class "*diseases of the respiratory organs*," the deaths amounted to 14 per cent. of the total deaths. The cases occurred chiefly amongst adults.

19. Under the head of "*diseases of the circulatory system*," it appears that deaths from "*disease of the heart*" are still on the increase. The deaths from this cause in the preceding year amounted to 147 cases; during the past year to 177. The mortality in this class preponderates invariably among the males.

20. The mortality from "*diseases of the digestive organs*" was slightly above 10 per cent. of all the deaths, nearly two-thirds of the cases occurring among children under five years of age. In Melbourne and suburbs 39 per cent. of the class took place from *teething*, 21 per cent. from *hepatitis*, 11 per cent. from *tabes mesenterica*, and 8 per cent. from *enteritis*. In the rest of the Colony beyond the metropolitan district 28 per cent. of the total deaths of the class were caused by *teething*, 25 per cent. arose from *enteritis*, 11 per cent. from *hepatitis*, and 9 per cent. from *tabes mesenterica*.

21. Of the remaining nosological classes, 28 deaths are recorded under that of "*diseases of the urinary organs*;" 75 under diseases of "*generative organs*," being cases of death from *childbirth*; 23 under "*locomotive organs*;" 8 under "*diseases of the integumentary system*;" 35 from "*old age*," seven of them having been between eighty and ninety years old at the time of their death.

22. As was observed in the previous year, the deaths from "*external causes*" are steadily on the increase, a result probably attributable to the great addition to the population which has taken place, naturally leading to an increase in the mortality from accidents, &c. In the previous year the number under this class was 714, in the last year 880: of these 740 were males and 140 females.

23. I am happy to be enabled to report that the number of deaths returned as from causes "*unspecified*" has continued regularly to decrease

since the commencement of the registration system. In my First Annual Report there were 205 instances in which the cause of death was not given; in my Second Report the number had decreased to 192; in my Third Report to 104; and on the present occasion they do not exceed 88. This is a most gratifying indication not only of vigilance on the part of the deputy registrars, but of the readiness of the medical profession and the public generally to afford the information required.

24. The mortality among the Chinese has been considerable, taking place as it has done principally among young men the majority of whom were under thirty years of age.

25. Of the 210 deaths which occurred at sea during the year, 19 were from *scarlatina*; 14 *typhus*; 21 from *atrophy* and *debility*; and 23 from *consumption*. One-third of the deaths were of the zymotic class.

26. The business of this department, naturally subject to constant increase, from its relation to the augmentation of the population, has received a considerable accession from the duties which have devolved upon it in carrying out the provisions of the Patent Act and the Act for the registration of Powers of Attorney. As experience, however, has been acquired, improvements have been effected in the internal arrangements of the office, and it has been found practicable to carry on these duties, as well as those under the Vaccination Act, and the preparation of the Agricultural and Annual Statistics, without any addition to the original establishment of clerks, and at a considerable reduction in the expense for official salaries. On the other hand, the disbursements under the head of "Contingencies" have largely and annually increased: these comprise the cost and preparation of the Census Returns, and the expenses incurred for Vaccination, the Registration of Births and Deaths, and the collection of the Agricultural Statistics of the Colony.

27. I have to congratulate the public on the circumstance that the insecurity of the valuable records of this office no longer exists, Government having provided a suitable fire-proof room for their custody.

28. In the execution of my duties I have continued to receive every assistance that I could desire from the zeal and ability of Mr. Archer, Assistant Registrar General, and the gentlemen employed in the department.

I have the honor to be,

Sir,

Your most obedient servant,

NORMAN CAMPBELL,

Registrar General.

To the Honorable

The Chief Secretary,

&c., &c., &c.

APPENDIX.

A LIST OF DEPUTY REGISTRARS AND THEIR DISTRICTS.

DISTRICT.	DEPUTY REGISTRAR.	DISTRICT.	DEPUTY REGISTRAR.
Alberton	William Hogarth	Keilor	P. T. Dowling
Amherst	William Wood	Kilmore	James W. Osborne
Anderson's Creek ...	E. H. Cameron	Kingower... ..	C. A. Campbell
Avoca	F. R. Lempriere	Kyneton	Henry Geary
Avenel	William Norris	Leigh	George Mather
Bacchus Marsh ...	E. W. Pilgrim	Lexton	George Watson
Ballan	Walter Scott	Lockwood	M. Marrack
Ballaarat	W. T. Pooley	Maldon	John Nott
Barnawartha	Ednott Burbank	Malvern and Caulfield ...	Thomas G. Henry
Balmoral	William Molloy	Maryborough	W. G. McCullough
Beechworth	J. W. Walden	Melbourne	E. B. Arnold
Belfast	W. E. Wheeler	Do.	Thomas Sunderland
Bellarine	A. W. Bailey	Mortlake	W. Hamilton
Benalla	F. G. Hinsby	Mount Ararat	J. E. Dobson
Boroondara	J. D. Bragge	Mount Blackwood	George Moore
Brighton	John Simmonds	Mount Moriac	W. J. Livingston
Broadmeadows	J. Weston	Murchison	George Thompson
Brunswick	Joseph George	Newbridge	C. J. Grant
Buckland	C. Meyer	Northcote	C. T. Turner
Bulla	Samuel Lazarus	Oakleigh	W. H. Wastell
Buninyong	W. B. Rankin	Point Nepean	James Reed
Campbellfield	Andrew Hanna	Prahran	John Tulloch
Camperdown	John Paton	Portland	Thomas Doolan
Cape Otway	H. B. Ford	Pitfield	George Currie
Carisbrook	W. F. Roe	Pleasant Creek	George Bull
Caramut	Robert Ewing	Port Albert	Thomas Burrows
Carngham	F. E. Perrot	Queenscliff	Charles Dod
Casterton	Caleb Radford	Raglan	W. Tonge
Castlemaine	E. D. Hankins	Richmond	W. H. Lagoe
Cheltenham	Richard Goldstone	Sale	J. Lightfoot
Coanyenne	A. Von St. Luz Boden	Sandhurst	J. T. Sanders
Colac	H. E. Nankivell	Do.	A. Barnett
Coleraine	George Trangmar	Do.	W. A. Roche
Collingwood	Samuel Allen	Do.	E. S. Maxwell
Cranbourne	Alexander Duff	Do. (Nerring)	Henry Sorley
Creswick	James Edmonston	Sandridge	A. Plummer
Crowlands	James Mackay	Schnapper Point	William Armstrong
Dandenong	V. Roberts	Smythe's Creek	William Short
Digby	R. J. Mercer	South Yarra	E. B. Taylor
Dunolly	W. C. Pierce	St. Arnaud	P. A. Jennings
Elephant Bridge... ..	L. Lowe	St. Kilda	F. T. Van Hemert
Echuca	W. B. Montfort	Steiglitz	James Western
Emerald Hill	William Haig	Swan Hill	R. McPherson
Epsom	W. P. Hill	Tandarook	Daniel Curdie
Flemington	Joseph Paterson	Taradale	Daniel Wilson
Fryerstown	F. A. Smith	Wangaratta	A. L. Ely
Geelong	James Quinan	Wardy Yallock	J. Chirnside
Gipps Land (North) ...	P. K. Simmons	Warringal	Edward Morey
Gisborne	Richard Haines	Warrnambool	J. M. Ardlie
Glenorchy	A. J. F. Caddy	Williamstown	Edmund Burke
Hamilton	Richard Garton	Winchelsea	E. Tanner
Harrow	B. B. Creagh	Woodford... ..	J. M. Patison
Heathcote	Charles Robinson	Woollert	Thomas Dignan
Hepburn	J. S. C. Coffin	Woolsbed... ..	J. A. Mulligan
Heywood	E. L. McKeand, jun.	Yan Yean	J. W. Campbell
Horsham	John Dobson	Yarra Bend	Robert Bowie
Inverleigh	William Bell	Yackandandah	James Ford
Kalkallo	Peter Crichton	Yambuck	D. B. Craig
Kangaroo Ground ...	Andrew Ross
